

**Outsmart  
Pests  
at  
PRONewEngland.org**

**Pest Resources Online for New England** is a website designed to answer questions and enhance communication about New England pest issues.

- \* **New England pest news and events**
- \* **A searchable library of over 1000 New England pest fact sheets**
- \* **Links to expert contacts in each state to answer your pest questions**
- \* **Pest forecasts for New England sites**
- \* **Links to the best web pages for New England pest topics**

PRONewEngland.org is a cooperative effort of the six land-grant universities in New England, funded by the Northeastern IPM Center.

In addition to the website, PRONewEngland creates surveys, profiles, and strategic plans to provide factual guidance for government policy decisions and university research and education programs. We foster communication among individuals, organizations, and university, state and federal government programs involved with pest issues.
